From September 2022 to February 2023

Web Developer — Anderson Tech, Lille
From 2021 to 2022

IT PROJECTS

CTF & PenTesting I spend the majority of my free time confronting myself to various cybersecurity challenges, CTFs (Capture the Flag), and other ressources availables online on HackTheBox, TryHackMe or RootMe.

GitHub My GitHub is regularly updated with some various personal projects, mainly scripts related to networking and cybersecurity, or web development. Lately, I've been working on an interactive portfolio, command line prompt style (project visible on my website www.hugovrbs.com).

Web Development When it's not for myself, I also offer my services as web developer professionally. For example, I made the website for the 'Ecole d'Optique de Lille' (www.ecole-optique-lille.com).

COMPUTER SKILLS
